1. **Remind students that ChatGPT and related tools do not meet the standards normally expected of academic or professional work.**
The lack of citations, the inability to reproduce responses to the same prompt,

the
difficulty
of
distinguishing
fact
from
disinformation,
the
lack
of
accountability
for
the
ethical
and
equitable
sourcing
of
information,
and
outright
“hallucinations”
are
among
the
known
issues.
Learning
to
think
and
write
critically
and
to
use
genuine
sources
of
truth
and
knowledge
form
the
hard
but
essential
core
of
a
liberal
arts
education,
and
are
the
most
important
skills
required
for
success
in
a

rapidly
changing
world.

2. **Be
explicit
with
students
about
your
expectations
regarding
the
use
of
ChatGPT
and
related
AI
tools**
for
assignments,
exams,
and
in
the
classroom,
and
be
clear
that
engaging
in
unauthorized
use
of
generative
AI
will
be
considered
a
violation
of
the
Honor
Code.
This
includes
AI
editing
tools
(such
as

Grammarly),
whose
suggestions
for
revising
content
are
AI-
generated
and
therefore
violate
a
policy
that
prohibits
AI
use.

3. **Consider
adding
a
specific
statement
in
your
syllabus
and
on
Canvas
regarding
the
use
of
AI
tools.**

The
following
sample
statements
may
be
helpful
in
crafting
statements
tailored
to
the
learning
goals

of
specific
courses:

- Before beginning your studies at Notre Dame, you signed the Honor Code pledge, affirming that you would not tolerate or participate in academic dishonesty, and this includes the appropriate use of generative AI tools. For the purposes of this class, you may not engage in unauthorized collaboration to complete any work for the course, and you may not use any

generative
AI
composition
or
editing
tools,
unless
it
is
specifically
permitted
for
the
assignment.

- AI
composition
or
editing
software
(like
ChatGPT
or
Grammarly)
may
not
be
used
for
assignments
in
this
course
unless
specifically
stated
in
the
assignment.
Using
these
tools
without
my
permission
puts
your
academic
integrity
at
risk.
When
this
use
has
been
permitted,
the
content
generated
or
modified
by
AI
must

be properly attributed.

- The use of AI tools is generally acceptable in this course, but, like any other source, must always be attributed in a manner that can be reproduced by the reader. An example of “reproducible” attribution includes the date accessed, the web address or URL accessed, and a description of the prompt. When using generative AI tools as a source of information,

you
are
responsible
for
assessing
the
quality,
completeness,
and
accuracy
of
the
cited
information.

- The
use
of
AI
tools
(like
ChatGPT)
is
generally
acceptable
in
this
course,
but,
like
any
other
source,
must
always
be
attributed
in
a
manner
that
can
be
reproduced
by
the
reader.
Moreover,
such
writing
aids
may
be
used
in
different
ways
at
different
stages
of
the
creative
process.
Therefore

if
you
use
any
of
these
systems
to
support
your
work
where
assignments
specifically
allow
it,
you
will
be
required
to
describe
the
uses
and
process.
Remember,
when
using
generative
AI
tools
as
a
source
of
information,
you
are
responsible
for
assessing
the
quality,
completeness,
and
accuracy
of
the
cited
information.

**4. Become
familiar
with
ChatGPT
and
related
tools.**

- Engage
with
colleagues,

students,
and
others
in
dialogue
regarding
the
use
and
misuse
of
generative
AI
in
your
academic
disciplines
and
the
professions
in
which
your
students
engage.
The
technology
is changing
rapidly
with
large
commercial
investments.
They
will
likely
become
pervasive,
ubiquitous,
and
embedded
within
the
common
applications
used
by
students,
scholars,
and
professionals
of
many
types.
What
this
means
for
the
high
standards
we
hold
for

teaching,
scholarship,
and
academic
integrity
is
a
vital
conversation
to
which
we
invite
your
thoughts
and
advice.

- Use
ChatGPT
yourself
and
put
your
assignments
into
the
system
to
see
how
it
responds.
Become
familiar
with
the
tools
and
how
your
disciplinary
community
is
understanding
them.
Impacts
of
this
technology on
the
disciplines
vary
as
to
how
fast
and
seriously
they
will
impact
specific
professions,
academic

disciplines,
and
pedagogical
approaches.

- Also,
remember
that
ChatGPT
does
not
know
whether
it
wrote
a
particular
piece
of
text;
if
you
ask
it
if
it
wrote
something,
it
will
often
say
yes
even
if
the
text
was
not
generated
by
AI.
