

Compliance and Enterprise Risk Committee's (CERC) Artificial Intelligence Risk Subcommittee (AIR)

CERC-AIR

Purpose and Structure

- The CERC-AIR Subcommittee was created at the joint suggestion of the [Provost's Advisory Council on Artificial Intelligence](https://evcp.berkeley.edu/initiatives/provosts-advisory-council-artificial-intelligence-pac-ai#:~:text=The%20Council%20will%20provide%20advice,%2C%20coordination%2C%20or%20executive%20responsibilities.) (<https://evcp.berkeley.edu/initiatives/provosts-advisory-council-artificial-intelligence-pac-ai#:~:text=The%20Council%20will%20provide%20advice,%2C%20coordination%2C%20or%20executive%20responsibilities.>) and the [Compliance and Enterprise Risk Committee](https://compliance.berkeley.edu/CERC) (<https://compliance.berkeley.edu/CERC>) (CERC) in 2025. Its purpose is to provide a risk assessment and risk mitigation advice to Berkeley units, departments, schools and colleges by reviewing proposed new AI tools or new uses of existing tools.
- While the committee expects that the majority of the proposals it reviews will involve administrative uses of AI, the committee welcomes proposals on tools used in teaching and research as well.
- CERC-AIR is comprised of representatives from CERC and other units across campus. CERC-AIR counts faculty, staff, and students among its members.

CERC-AIR Review Process

Overview of AI Risk Assessment Process

- CERC-AIR's review is informed by the [UC AI Council](https://ai.universityofcalifornia.edu/ai-communities/roster.html) (<https://ai.universityofcalifornia.edu/ai-communities/roster.html>)'s [Risk Assessment Guide](https://ai.universityofcalifornia.edu/files/documents/final-uc-ai-council-risk-assessment-guide-1.0.pdf) (<https://ai.universityofcalifornia.edu/files/documents/final-uc-ai-council-risk-assessment-guide-1.0.pdf>).
- CERC-AIR meets every two weeks. Proposals may be referred to CERC-AIR through the procurement process, or individuals who are developing their own tools can also consult with CERC-AIR.
- In order to have your proposal reviewed by CERC-AIR, please complete an [AI Risk Pre-Screening](https://forms.gle/RRuLtm4YMLGJdgff6) (<https://forms.gle/RRuLtm4YMLGJdgff6>). This screening will assist the committee in determining whether the proposed use of AI falls in CERC-AIR's purview. Requestors will be advised as to next steps immediately following submission of the screening.
- Following completion of the AI Risk Pre-Screening, requestors whose proposals are deemed to be within the purview of CERC-AIR will be asked to complete the [Full AI Risk Assessment](https://forms.gle/GU6jS6d1gLDQsTGKA) (<https://forms.gle/GU6jS6d1gLDQsTGKA>).
- The result of CERC-AIR's review is a high level risk assessment as well as specific recommendations for the unit head to consider before moving forward with the proposal. CERC-AIR may also refer proposals to other specialized offices or committees as appropriate.
- CERC-AIR's review may occur simultaneously with reviews for privacy, security, or accessibility, as appropriate.

Contact

- Email cerc-air@berkeley.edu (<mailto:cerc-air@berkeley.edu>) if you are interested in learning more about the CERC-AIR review process.
