Generative AI & Your Course

[Home](#) » [Design a Course](#) » Generative AI & Your Course

Read, Refine, Define & Articulate

The sheer daily volume of new information and insights about Generative AI (genAI) makes it imperative for all of us to set aside regular periods of time to reflect¹ on this powerful tool. We hope you'll take time to develop your own reflections as well as discuss with your colleagues and students the successes and challenges you encounter, as well as identify lessons learned, and brainstorm about potential modifications for future semesters.

To help MIT faculty & instructors navigate the sea of information on the use of genAI in higher education², TLL has combined timely news, advice, and resources on genAI with best practices in teaching and learning. As you design and deliver your subjects in this rapidly changing world of genAI, we recommend that you engage with the following:

- Refine your goals for learning
- Be clear about your expectations and the acceptable use of GAI
- Rethink your assignments & assessments
- Consider alternate subject formats
- Design for equity, accessibility, and student privacy

The corresponding tabs below are designed to guide you through your planning process and support your teaching throughout the semester.

In addition, you can download our Quickstart Guide to Thinking about AI in your Course to reference when considering how to use (or not use) genAI in your course.

[SU25-GAI Policies&Practices](#)

Are you interested in leveraging the utility of generative AI to create more meaningful assignments and more authentic learning experiences? Would you like to talk with someone about your ideas and concerns about genAI? Contact us (TLL@mit.edu) to request a consultation.

Refine Your Goals	Define Acceptable Use	Revise Your Assignments & Assessments	Consider Course Format	Equity, Access, Privacy

MIT Resources and Support

Staff from TLL and Open Learning-Residential are available to facilitate discussions within MIT DLCs on the topic of *Teaching with GenAI*. MIT community members can email ai-teaching@mit.edu to arrange a session. If you'd like to facilitate your own discussion – a customizable slide deck is available [here](#). [You will be prompted to make a copy.]

Sloan – [Teaching & Learning with Generative AI Hub](#)

[Advice Concerning the Increase in AI-Assisted Writing](#), Profs. Ed Schiappa and Nicholas Montfort, Comparative Media Studies & Writing @ MIT.

If you are an MIT community member and have resources you'd like to share, please email us at: ai-teaching@mit.edu.

¹ The [Poorvu Center for Teaching and Learning at Yale](#) states: "Reflective teaching involves examining one's underlying beliefs about teaching and learning and one's alignment with actual classroom practice before, during, and after a course is taught. When teaching reflectively, instructors think critically about their teaching and look for evidence of effective teaching."

² For a good overview of what LLMs are and how they work, see. Kevin Rose and Cade Metz, On Tech: [AI Newsletter series: How to Become an Expert on A.I.](#), *New York Times*, 7 April 2023.
