

1.3.3 Using ChatGPT & Artificial Intelligence (AI) Tools

1.3
Academic
Standards
of
Conduct

The
University
supports
responsible
experimentation
with
generative
AI
tools,
but
there
are
important
considerations
to
keep
in
mind
when
using
these
tools,
including
information
security
and
data
privacy,
copyright
and
academic
integrity.
Generative
AI
is

a
rapidly
evolving
technology
and
HBS'
policies
may
be
updated
from
time
to
time.
Students
are
expected
to
remain
informed
of
all
current
policies.

Faculty
may
allow
the
use
of
ChatGPT
and

similar
technologies
in
some
circumstances,
but
students
must
ensure
that
such
use
is
permitted
and
must
make
sure
they
understand
any
limitations
on
such
use
before
using
this
technology.

In
using
ChatGPT
or
other
generative
AI
tools,
students
must
be
aware
of
their
limits
and
apply
best
practices
to
their
use:

- Protect
confidential
data:
Students
should
not
enter
data

classified
as
confidential
(Level
2
and
above),
including
non-
public
research
data,
into
publicly-
available
generative
AI
tools,
in
accordance
with
the
University's
**Information
Security
Policy**
(<https://policy.security.harvard.edu/>).
Information
shared
with
generative
AI
tools
using
default
settings
is
not
private
and
could
expose
proprietary
or
sensitive
information
to
unauthorized
parties.

- Students
are
responsible
for
any
content
that
they

produce
or
publish
that
includes
AI-
generated
material:
AI-
generated
content
can
be
inaccurate,
misleading,
or
entirely
fabricated
(sometimes
called
“hallucinations”),
or
may
contain
copyrighted
material.
Students
must
review
all
AI-
generated
content
very
carefully,
recognizing
that
they
are
ultimately
responsible
for
the
accuracy
of
any
work
they
submit.

- As
clarified
in
the
HBS
Citation
Guide
(<https://www.library.hbs.edu/find/guides/citation->

management-

guides-

tools),

students

must

cite

their

use

of

these

AI

tools

appropriately.

Not

doing

so

violates

the

MBA

Honor

Code

(/mba/handbook/standards-

of-

conduct/academic/honor-

code),

just

as

would

failing

to

cite

any

other

source.

- Students must contact HBS IT before procuring any generative AI tools. HBS IT will coordinate with Harvard University IT (HUIT), as the University is working

to
ensure
that
any
AI
tools
procured
on
behalf
of
Harvard
or
used
in
the
Harvard
environment
have
the
appropriate
privacy
and
security
protections.

Students
who
are
considering
procuring
generative
AI
tools
or
have
questions
about
AI
tools
should
contact
HBS
IT
at

mbaithelp@hbs.edu
(mailto:mbaithelp@hbs.edu).

All
vendor-
generative
AI
tools
must

be
assessed
for
risk
by
**Harvard's
Information
Security**

and
Data
Privacy
office
(<https://security.harvard.edu/>)
prior
to
use.

All
HBS
students
are
expected
to
understand
and
follow
the
complementary
guidelines
for
the
responsible
use
of
AI
that
have
been
issued
by
Harvard
University
(<https://huit.harvard.edu/ai>)
and
by
HBS
(login
required)
(<https://inside.hbs.edu/Departments/mba/support/default.aspx?page=generative-ai-guidelines>).
