

Dr. Suh's TA Bot

How a non-coder built an AI teaching assistant, and how you can too

Jungho Suh, Ph.D. · Department of Management

AI in Action Award recipient · suhjungho@gwu.edu

Poll 1

How many of you have written code?

Poll 2

How many of you have **vibe-coded**?

THE PROBLEM

Big classes, the same questions

299

students taught at GWSB in
2025

9

three-credit courses in one
year

3

programs: MBA,
undergraduate, and MS

Syllabus. Deadlines. Course policies. Quick questions that sat waiting for office hours or an email reply.

WHERE IT CAME FROM

The idea came from my students

AI Playbook Project for Entrepreneurs

AI Playbook Project for HR Leaders

Class discussions on custom GPTs

Dr. Suh's TA Bot

24/7 answers to common course questions

Built on my own initiative and mostly my own budget: **no IT ticket, vendor contract, or development team.**

WHAT IS VIBECODING?

Describe what you want in plain language.
An AI coding assistant writes the code.

I hold a Ph.D. in Management, with no formal coding background. Using Claude Code, I designed, built, tested, and launched a live chatbot within one semester.

Dr. Suh's TA Bot · AI in Action Awards Seminar Series

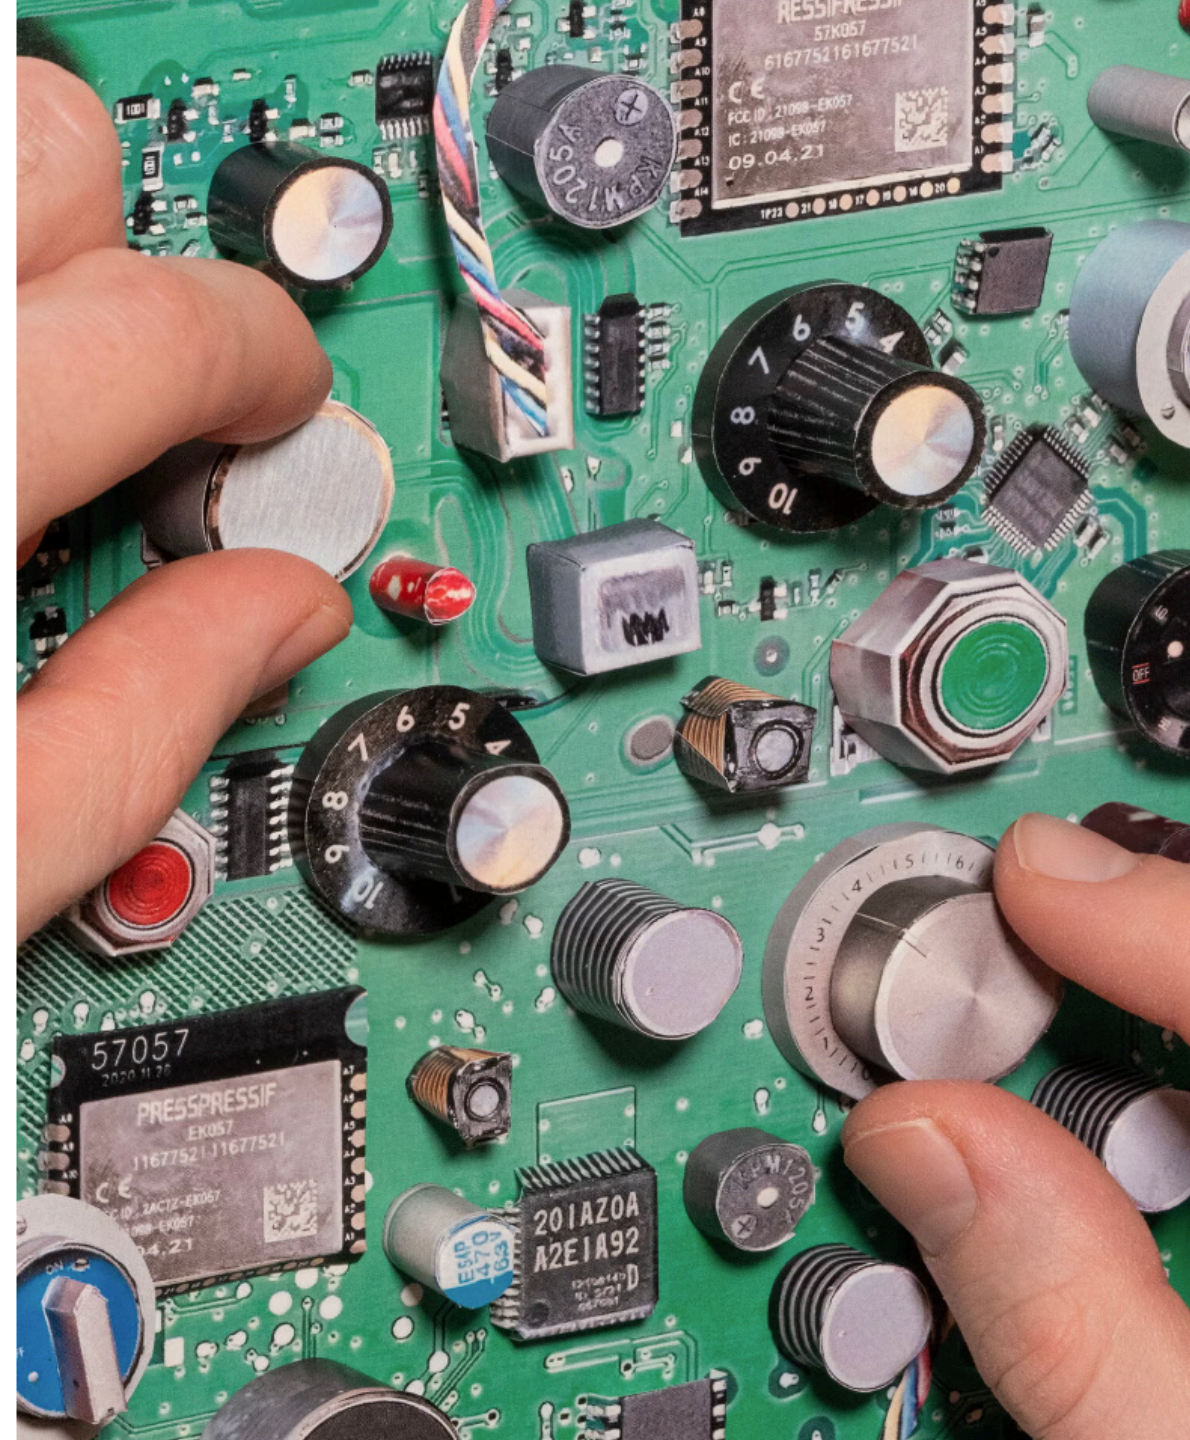

THE SHIFT

Not a Coder? With A.I., Just Having an Idea Can Be Enough.

I'm not a programmer. But I've been creating my own software tools with help from artificial intelligence.

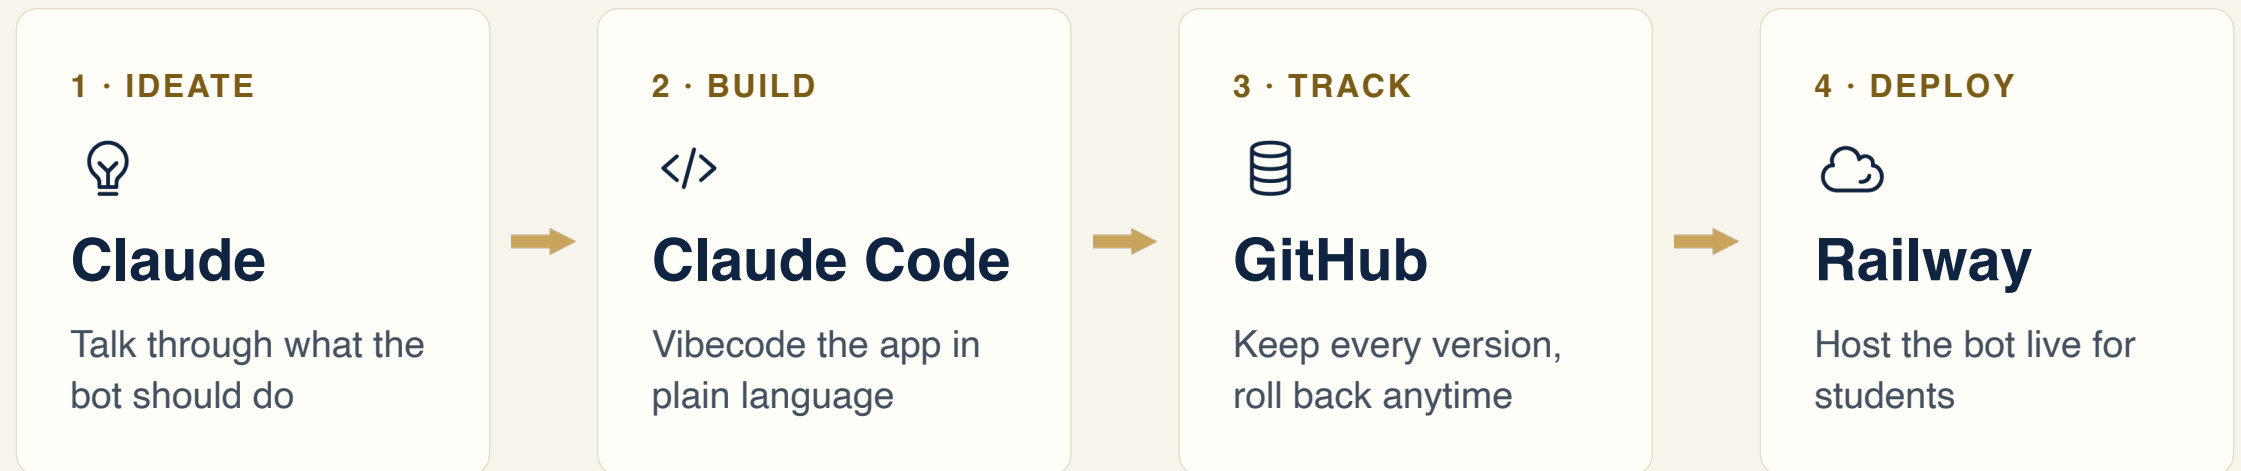

Poll 3

Are you willing to fully support vibecoding?

THE WORKFLOW

Four steps, four tools

Answers come from Claude Sonnet via Claude Console (API). **To adapt it, swap in your own course content.**

CLASS CODE

Access is limited to class members; today, you're in the class.

Scan to Open the TA Bot

- Class Code Required

LAUNCH WEEK · MARCH 5–9, 2026

Real students, real usage, from day one

82

requests on the peak
day

<1%

sustained error rate
after launch

<1s

median response time
(p50)

348K

tokens processed by
Claude Sonnet

Usage was logged on every observed day; launch day alone brought 304,585 input tokens. **Lesson learned:** occasional slow first replies came from Railway's idle-container cold starts, not from the bot itself.

IN THEIR WORDS

What students said on LinkedIn

“

Our conversations in class about AI in HR inspired me to vibe code and build my own AI powered tool for the AI Playbook project.

Juliana D.

“

Thank you for always going the extra mile to support us and for providing up-to-date learning tools, like this bot.

Karime G.

“

Your perspective and teachings on AI have shaped the way many of us utilize this tool within our personal, professional, and academic settings.

Sloane B.

Guardrails built in from day one

“This bot is not here to replace my incredible TAs and teaching team.”

Access control

Only enrolled students receive the class code.

Human in the loop

Routine questions go to the bot; complex or sensitive ones go to me or my TAs.

Policy alignment

Built around GW's norms for AI use, data privacy, and data security.

WHAT COMES NEXT

From one experiment to shared practice

Build your own. The workflow transfers to any discipline: swap in your course content.

In print. Featured in my forthcoming textbook, *New Venture Creation: Evidence-Based Entrepreneurship in the Age of AI* (Taylor & Francis).

Learn together. I'm glad to share the workflow and lessons learned, and would love to host a hands-on vibecoding workshop.
